

Scribbl.it™

QUERIES

A database is a
"persistent, organized
store of data".

CRUD

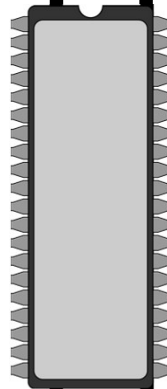

SELECT

SELECT is used to read
data from database
queries.

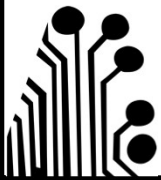

INSERT allows you
to add a new record
of data

INSERT

UPDATE allows you to
change data in records,
but always use a
WHERE clause!

UPDATE

DELETE

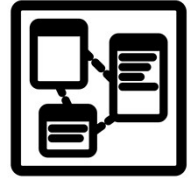

Actions in a
database cannot
be undone,
DELETE removes
a record forever!

Scribbl.it™

QUERIES

Queries can be made more complex by adding criteria

OPTIONS

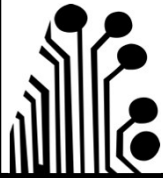

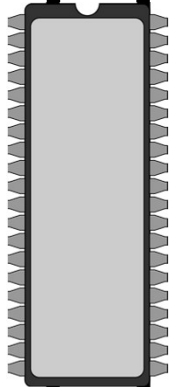

WHERE

WHERE allows you to add a condition to a query.

AND VS. OR

AND and OR allow you to widen or lessen your search criteria

Like allows you to use a wildcard in the criteria

LIKE VS. =

ORDER BY

ASC & DESC allow you to change the order
