

# PREVENTING VULNERABILITIES

Organisations have a legal obligation to put procedures in place to keep the data that they hold safe

## PENETRATION TESTING

Employing users with knowledge of cracking to test how resilient a system helps to put measures in

Data Protection Laws  
DPA 1998  
GDPR 2018

## USER ACCESS LEVELS

user access levels apply to whole folders & systems rather than just files

## BACKUP & RECOVERY

Disaster recovery requires a system to store redundant data away from the physical location of the system.
