

CALCULATING STORAGE SIZE

KB TO TB

How many 104Mb files would fit on a 1Tb drive?

$1 \times 1000 = 1000$ (Tb \rightarrow _____)

$1000 \times 1000 =$ _____ (Gb \rightarrow Mb)

$1,000,000 \text{ Mb} / 104 \text{ Mb} =$ _____ files!

A different name is given to capacity using 1024:

KibiByte =

MebiByte =

1024?

FILE SIZES

Different types of file will have different sizes based on the amount of data needed.
